

Supplementary Material to “One for all and all for one: two mixed-species shoaling of stream fish”

Table S2. Values of occurrence (%) and chi-squared test with their respective *p*-values for each feeding behavior carried out by *Compsura heterura* and *Serrapinnus piaba* in Curu stream, municipality of Pentecoste, state of Ceará, Brazil.

Foraging type	Occurrence (%)		Chi-squared	
	<i>Compsura heterura</i>	<i>Serrapinnus piaba</i>	X ²	<i>p</i>
Bottom	10.6	16.8	2	0.157
Middle	46.0	45.4	0.038	0.846
Surface	34.5	28.6	0.342	0.558
Macrophyte	8.8	9.2	0.048	0.827
