

**Conservation of species-rich subtropical grasslands: traditional management vs.
legal conservation requirements in primary and secondary grasslands**

doi: 10.1590/0102-33062019abb0306

Table S1. Endemic and endangered species recorded in three grassland types (PGCA = primary grasslands in conservation areas, SGCA = secondary grassland in conservation areas, PGTM = primary grassland subjected to the traditionally management) at the fifty-eight study sites in southern Rio Grande do Sul, South Brazil. The degree of threat of species was checked in the current Red List made for the state (Decreto Estadual nº 52.109/ 2014) and endemic species is according to Andrade *et al.* 2018 – ED: Endemic; CR: Critically Endangered; EN: Endangered; VU: Vulnerable; NT: Near Threatened.

Families / Species	Categories	PGCA	SGCA	PGTM
Amaranthaceae				
<i>Gomphrena sellowiana</i> Mart.	ED, CR	X		
<i>Gomphrena graminea</i> Moq.	NT	X		X
<i>Gomphrena perennis</i> L.	NT	X		
<i>Pfaffia gnaphalooides</i> (L. f.) Mart.	NT	X		X
Apocynaceae				
<i>Mandevilla coccinea</i> (Hook. & Arn.) Woodson	VU	X		
Asparagaceae				
<i>Clara ophiopogonoides</i> Kunth	EN	X		X
Asteraceae				
<i>Lessingianthus macrocephalus</i> (Less.) H.Rob.	ED	X		X
<i>Pamphelea commersonii</i> Cass.	EN	X		X
<i>Schlechtendahlia luzulifolia</i> Less.	ED, NT	X		
<i>Trichocline cisplatinia</i> E. Pasini & M.R. Ritter	ED, VU	X		
<i>Trichocline incana</i> (Lam.) Cass.	EN	X		
Bromeliaceae				
<i>Dyckia choristaminea</i> Mez	ED, EN	X		
<i>Dyckia leptostachya</i> Baker	VU	X		X
Cactaceae				
<i>Frailea gracillima</i> (Lem.) Britton & Rose	ED, VU	X		
<i>Frailea pygmaea</i> (Speg.) Britton & Rose	ED, VU			X
<i>Gymnocalycium denudatum</i> (Link & Otto) Pfeiff. ex Mittler	ED, EN	X		
<i>Parodia ottonis</i> (Lehm.) N.P. Taylor	VU	X		X
Euphorbiaceae				
<i>Croton gnaphalii</i> Baill.	ED	X		
<i>Adesmia securigerifolia</i> Herter	ED	X		
<i>Mimosa rocae</i> Lorentz & Niederl.	ED, EN	X		X
<i>Mimosa cf. schleidenii</i> Herter	ED, CR	X		
Iridaceae				
<i>Cypella pusilla</i> (Link, Klotzsch & Baker) Benth. & Hook. f.	ED, CR	X		X
<i>Herbertia pulchella</i> Sweet	ED	X		X
<i>Kelissa brasiliensis</i> (Baker) Ravenna	ED, VU	X		X

Table S2. Species and their mean cover value in three grassland types (PGCA = primary grasslands in conservation areas, SGCA = secondary grassland in conservation areas, PGTM = primary grassland subjected to the traditionally management) at the fifty-eight study sites in southern Rio Grande do Sul, South Brazil. Data is from quantitative sampling conducted in three groups of three 1m² subplots per site. For species considered in the analysis of indicator species the significance level is indicated with the respective cover value (in one or two groups): *** < 0.001, ** < 0.01, * < 0.05. Exotic species are identified with * after the species name, according to Rolim *et al.* (2014).
