

SUPPLEMENTARY MATERIAL

TABLE SII

Composition, abundance (PAI) and distribution of birds along the vegetation gradient in Maciço do Urucum, western Brazil. n = number of stations. *Species without PAI did not occur in point counts, but were observed in the study area.

TAXON	Riparian Forests n=8	Submontane Forests n=8	Forested Savannas n=8	Arboreal Savannas n=8	Altitudinal Grasslands n=8	Study Area n = 40
