

## Supplementary Material to “Can plant DNA barcoding be implemented in species-rich tropical regions? A perspective from São Paulo State, Brazil”

**Table S5** - List of GenBank accessions found for the São Paulo tree flora. For species with larger number of sequences, it is given the accession interval for each barcode. Note that the GenBank accessions for the sequences produced here are listed in the main text.

Family	Species	Accession	Barcode
Acanthaceae	<i>Avicennia germinans</i>	AB861082-AB861219	ITS
