

SUPPLEMENTARY TABLE S2: Association between the occurrence of adverse events and the sociodemographic, lifestyle, clinical, and quality of life characteristics of the population.

Variables	Crude model OR (CI 95%)	p- value	Adjusted model OR (CI 95%)	p- value
Sex				
Female	1,00	0,632	1,00	0,394
Male	0,82 (0,36-1,85)		0,56 (0,15-2,12)	
Age group (years)				
15 to 29 years	1,00		1,00	
30 to 59 years	1,75 (0,63-4,87)	0,282	3,07 (0,59-15,84)	0,180
60 years or more	1,73 (0,60-4,97)	0,306	2,78 (0,32-23,88)	0,351
Education level				
Illiterate	1,00		1,00	
Middle school	0,30 (0,03-2,68)	0,282	0,34 (0,02-5,43)	0,444
High school	0,50 (0,05-4,67)	0,543	1,89 (0,10-35,54)	0,669
Higher education	0,33 (0,03-3,26)	0,345	0,62 (0,03-13,17)	0,763
Alcohol consumption				
No	1,00	0,920	1,00	0,686
Yes	1,04 (0,50-2,15)		1,26 (0,40-3,95)	
New case				
No	1,00	0,127	1,00	0,182
Yes	0,47 (0,17-1,24)		0,25 (0,03-1,90)	
Clinical form				
CL	1,00	0,014	1,00	0,242
ML	4,89 (1,38-17,25)		5,77 (0,31-108,42)	
Comorbidities				
No	1,00	0,607	1,00	0,513
Yes	1,21 (0,59-2,47)		1,54 (0,42-5,69)	
Polypharmacy				
No	1,00	0,184	1,00	0,499
Yes	0,47 (0,15-1,43)		0,51 (0,07-3,60)	
Potential drug-drug interactions				
No	1,00	0,237	1,00	0,971
Yes	1,90 (0,66-5,53)		1,05 (0,07-15,99)	
Number of lesions				
Up to 3	1,00	0,216	1,00	0,857
4 or more	1,98 (0,67-5,88)		0,86 (0,16-4,62)	
Treatment				
IV-MA	1,00		1,00	
IL-MA	0,15 (0,06-0,38)	0,000	0,15 (0,04-0,50)	0,002
MILT	5,25 (1,11-24,87)	0,037	5,02 (0,42-60,09)	0,203
L-AMB	0,42 (0,11-1,59)	0,202	0,16 (0,01-2,66)	0,199
VAS				
Below the population mean	1,00	0,027	1,00	0,131
Above the population mean	0,37 (0,15-0,89)		0,36 (0,10-1,36)	

Legend: OR: Odds ratio and 95% confidence interval. Crude model: no adjustment for confounders. Adjusted model: adjustment for sociodemographic variables, lifestyle, clinical variables, and VAS. Legend: CL: cutaneous leishmaniasis. ML: mucosal leishmaniasis. IV-MA: intravenous meglumine antimoniate. IL-MA: intralesional meglumine antimoniate. MILT: miltefosine. L-AMB: liposomal amphotericin B. VAS: visual analog scale of quality of life.
