Serum 25-hydroxyvitamin D levels did not improve with N-Acetylcysteine administration or with abstinence in adults treated for alcohol use disorder: a secondary analysis of a randomized, double-blind, placebo-controlled clinical trial – Piazza FRG et al.

Supplementary Table S1 Concentrations of 25(OH)D at the time of hospital admission (W0) according to seasonality

Seasonality	Median (ng/mL)	Interquartile range
Fall	30.55	16.05-38.55
Winter	15.80	11.60-18.60
Spring	18.30	6.80-23.25
Summer	28.75	21.35-35.05
