

Supplementary Material to “Elevated circulating fibroblast growth factor 23 is associated with acute kidney injury and mortality in coronavirus disease 2019 (COVID-19)”

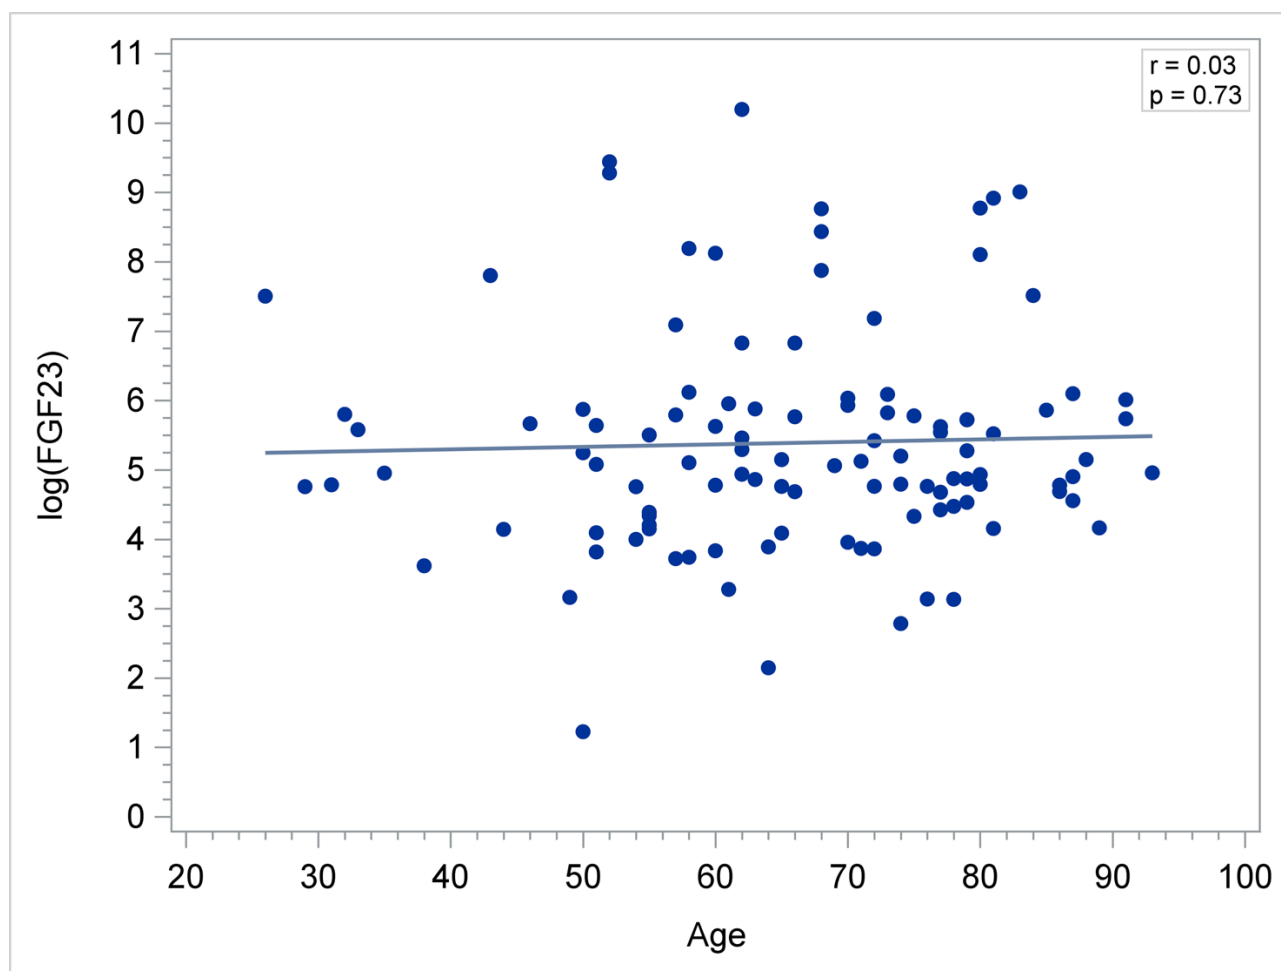

Figure S1 - Correlation between FGF23 and Age in patients with COVID-19.

Linear correlation of log (FGF23) and age in the entire COVID-19 cohort. Log (FGF23) is not associated with age ($r=0.03$, $P=0.73$).
