

Supplementary Material to “Current treatment of lupus nephritis: an overview of the new guidelines”

Table S2 – Criteria that compose activity and chronicity indices in the assessment of proliferative lupus nephritis.

Activity criteria	Scores	Chronicity criteria	Scores
Endocapillary proliferation	0-3	Global glomerulosclerosis	0-3
Interstitial inflammation	0-3	Fibrous Crescents	0-3
Hyaline deposits	0-3	Tubular atrophy	0-3
Fibrinoid necrosis (x2)	0-3	Interstitial fibrosis	0-3
Cellular/fibrocellular crescents (x2)	0-3		
Neutrophils/karyorrhexis	0-3		
Total	0-24	Total	0-12

Note – Scores respect intensity of each finding: 0 = <10%, 1 = 10-25%, 2 = 25-50%, 3 = > 50%.
