

Supplementary Materials – Appendix

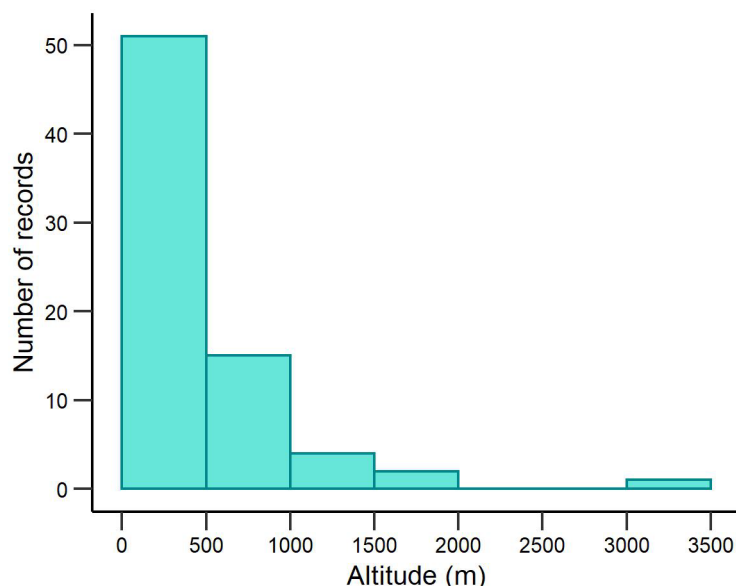

Appendix - *Cuscuta* species found in the databases of the 45 Mexican herbaria. For each species, we show the number of vouchers in the database, distribution, altitudinal range (if data were enough, the histogram of the altitudinal distribution), the vegetation types, and the host species recorded. Species names were reviewed and homogenized according to the Missouri Botanical Garden database (<https://www.tropicos.org/home>; consulted: 16/November/2023). In parenthesis, we show species synonyms (when host species names reported in herbaria vouchers were actualized) or when more than one voucher was recorded, the number of vouchers reported to a Mexican state, Vegetation type, or host species.
